

Container Shipping Conference & Exhibition 2025

May 12-13, 2025 | Houston, TX, USA

Drive greater efficiency & transparency through Digitalization!

Our previous & current sponsors/partners:

ABOUT THE CONFERENCE

Container Shipping Conference 2025 brings together key players of the Container, Transport and Logistics industry, to probe and explore winning strategies and technologies, by means of innovations in dealing with the current and future logistics challenges of the Container Industry.

This platform showcases the practical application of digital technologies and sustainable fuel options to drive eco-consciousness within the shipping sector. It assembles a diverse assembly of professionals, including 3PLs, Freight Forwarders, Shippers, Carriers, Govt. Officials, Port Officials, Transportation & Logistics providers, and other stakeholders, for in-depth discussions on emerging industry trends and best practices.

The primary goal of this event is to bring together professionals from the global container shipping industry to focus on major issues including developing a strategic roadmap for achieving a sustainable global environment by significantly reducing carbon emissions, leveraging technological innovations to optimize fuel consumption, exploring the potential of self-navigating vessels, and more.. This gathering provides a vital platform for knowledge sharing and collaboration among industry leaders, fostering the development of sustainable practices that benefit both the industry and the environment.

With an intense 2-day agenda, the conference seeks to expand in-depth discussions, strategies and applied knowledge along with technological challenges of supply chain & logistics operations. You will gain insights from the best in the industry and make lifelong friends.

Dealing with Supply Chain and Logistics Risk Insomnia

- Supply chain professionals are increasingly facing a challenge known as Insomnia, which negatively impacts efficiency and resilience. Addressing this issue is crucial, considering the various risks involved: geopolitical conflicts, currency fluctuations, port congestions/strikes, pandemics, shifting consumer demands, fuel price changes, and environmental regulations.
- Understanding the demand plan is the initial step in mitigating supply chain risks. Collaborative Planning Forecasting and Replenishment (CPFR) is a shared ecosystem approach to planning that enhances visibility and speeds up decision-making, making supply chains more resilient.
- The second step involves sustainable procurement that considers the economy, society, and environment. Digital procurement, like E-auctions, can enhance efficiency and secure favorable prices. Diversifying suppliers and clear spend management are strategies to manage delays and raw material shortages.

Priyanka Gowrishankar
 Logistics Manager, **JBF RAK LLC**
